LUCKY ANISH

AI/ML Engineer • Full Stack Developer

luckyyadav1180@gmail.com | https://www.linkedin.com/in/luckyanish136 | https://www.github.com/Lucky136-code | portfolio-sooty-one-44.vercel.app | Jaipur, Rajasthan, India

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning 2023 – 2027 (Expected)

NIMS University • Jaipur, Rajasthan

Relevant Coursework: Deep Learning, Natural Language Processing, Computer Vision, Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks

TECHNICAL SKILLS

Languages	Python, JavaScript / TypeScript, Java, Go, Rust, SQL
ML / AI	TensorFlow, PyTorch, Keras, Scikit-Learn, HuggingFace Transformers, OpenCV, BERT, CNNs, LLMs
Web / Backend	React, Next.js, Node.js, FastAPI, Flask, REST APIs, MongoDB, PostgreSQL, Supabase
Tools & Infra	Docker, Git, GitHub, Vercel, Linux, Jupyter, VS Code, Razorpay

PROJECTS

Image Classification CNN Mar 2025

Python · TensorFlow · Keras · CNN | github.com/luckyanish

- Built a deep learning image classifier on the CIFAR-10 dataset achieving 92.3% validation accuracy across 10 classes.
- Trained over 12 epochs on 60,000 samples; applied data augmentation and batch normalization to reduce overfitting.
- Designed a custom CNN architecture with convolutional, pooling, and dropout layers using the Keras Sequential API.

BERT Sentiment Analysis API Mar 2025

Python · HuggingFace Transformers · Flask · BERT | github.com/luckyanish

- Fine-tuned a pre-trained BERT transformer model for binary sentiment classification achieving 89.1% accuracy on 25K samples.
- Built and deployed a Flask REST API exposing a /predict endpoint for real-time inference.
- Optimised tokenisation and batching pipeline reducing average inference latency by ~40% vs. baseline.

Collaborative Filtering Recommendation System Feb 2025

Python · Scikit-Learn · Matrix Factorization · FastAPI | github.com/luckyanish

- Implemented a matrix factorization model on the MovieLens 100K ratings dataset achieving 84.3% Precision@10.
- Applied SVD-based collaborative filtering; tuned hyperparameters for optimal coverage and diversity.
- Exposed the model as a RESTful API enabling real-time top-N recommendation queries.

Vet Clinic Web Application Sep 2025

React · Next.js · Supabase · Vercel | vet-clinic-drab.vercel.app

- Built a full-stack veterinary clinic platform featuring appointment booking and pet health record management.
- Integrated Supabase for persistent PostgreSQL-backed storage replacing volatile React state.
- Deployed on Vercel with CI/CD from GitHub; fully responsive across mobile and desktop viewports.

Uma Traders — Business Website (Live Client) Jan 2025

HTML · CSS · JavaScript · Full Stack | umatraderss.com

- Designed and delivered a production website for a luxury natural stone and handicrafts business serving real customers.
- Implemented dynamic product catalog, inquiry system, and WebGL-inspired canvas animations for brand storytelling.
- First fully deployed client project, now live and actively used by the business.

EXPERIENCE

Freelance Web Developer Jan 2025 – Present

Self-Employed • Jaipur, India

- Delivered full-stack web solutions for real clients including Uma Traders (umatraderss.com), a live production site.
- Handled end-to-end project lifecycle: requirements gathering, design, development, testing, and deployment on Vercel.
- Built NIMS FEST '26 — a competition-grade festival website using Three.js, GLSL shaders, Supabase, and the Anthropic API.

CERTIFICATIONS

Getting Started with AI on Jetson Nano Dec 2025

NVIDIA Deep Learning Institute • Certificate of Competency • ID: jjzDXD9kS3u4lOXSbhuMUw

Introduction to Generative AI Studio Dec 2025

Google Cloud via Simplilearn SkillUp • Certificate Code: 9638839

ACHIEVEMENTS & ACTIVITIES

- Taretinggplacement — actively grinding LeetCode (Data Structures & Algorithms, System Design).
- Bunlyd5+ ullsck nd L jecs in a 6-nths M-taeted ptfolio roadmap.
- Explored LLM integration and generative AI — built an AI assistant feature powered by the Anthropic Claude API.
- Designed and architected an AI OS layer (cross-platform voice + text agent) using Tauri, Whisper, and LLM tool-calling.
